

Features and benefits

Live Map

Live Map shows every journey your vehicles have made via a single view. This will help you to identify any anomalies or unusual events and investigate them further if needed.

Journey Playback

Journey Playback presents a complete list of journeys and distances undertaken. With this feature, you get a report for each vehicle that will provide detailed vehicle utilisation information.

Driver Performance

Driver Performance presents driver scores for your entire fleet and an overview of speeding metrics. With this insight, you can train drivers effectively and do what is needed to eradicate speeding offences.

Vehicle Performance

Kinesis atom is one of the first products on the market to fully integrate fuel card data with vehicle tracking, providing a clear picture of fuel spend for accurate MPG information that gives your business maximum control over the performance of your fleet.

Geofencing

Geofencing allows businesses to easily create virtual zones, which trigger an alert when vehicles either arrive or leave a specific area or a point of interest.

One Invoice, One Portal

Take the complication out of fleet management with one invoice and one management portal by integrating the Kinesis atom with your pre-existing fuel cards.
