

# Battery Powered Trailer/Asset Tracking Device

Our battery powered trailer/asset tracking device has been expertly designed for reliable multi-year, long-term deployments for assets with few maintenance needs. It allows you to track business assets in real-time.

## How is the device installed?

Our device is easily-fitted either using four corner screws or a secure magnetic mounting, making installation quick and inexpensive.

## Reporting Frequency?

Our device sends a daily automated location report.

## Battery Life?

Our device has been designed to last six years based on standard reporting frequency.

## Is the device waterproof?

Our device is IP67 rated and sealed within a protective casing.

## How will they appear in the customer portal?

We recommend setting up separate groups to differentiate from your other vehicles.

## Recommended Uses?

Trailers and high value assets.

## Dimensions

55 x 55 x 260 mm

## Weight

907 g
